

EPR Registration Tool

20.09.2022

Mode of operation of an EPR-System

- EPR is a policy instrument on the polluter-pays principle
- With the fees, the distributors take the responsibility that packaging materials can be disposed in an **environmentally appropriate** way
- The fees are used to collect, sort, recycle or dispose packaging waste and help combat pollution in Jordan
- An EPR registration tool supports the PRO/Unit to charge fees in an efficient, transparent, and equitable manner - for all companies

Registration & fee collection from obliged companies

2. Citizen Participation

3. Collection

4. Sorting

5. Treatment

Producer
Responsibility
Organisation
(PRO) / Unit

How the registration tool can support the EPR system in Jordan

- Announcement of a transparent price system
- Companies are always aware about the fees they have to pay
- Unit and the Steering Board get up to date information about the quantity of packaging material entering the markets
- Unit and the Steering Board get up to date information about the money entering the system
- The platform has been implemented for English and Arabic (front-end and back-end areas, to be selected by the user).

Thank you
